Andrew Petriccione
CSCI 344 Spring 2015

   I don't have any particular preference for who I work with, except that I've worked with Brett Hodges a lot on projects and I know we work well together. Other than that, here's my list of things I'd be interested in doing with the project.

1. Sorting
2. Fixing odd behaviors and 'bugs'
3. adding animations and other things like that
4. Publishing the web app so we could put it on programmableweb.com
